

# Talking Research

Join us on Wednesday, November 25, 2020 at 12:15-1:00 for an exchange of knowledge between clinicians, researchers and students.

**25 November Matthew Slopecki**

**"Is sex a proxy for anthropometric variables during fatiguing, upper-limb repetitive movement? What researchers and clinicians should know"**

Zoom link: [http://bit.ly/2TgBHjr\\_Slopecki2020](http://bit.ly/2TgBHjr_Slopecki2020)

Presented by Matthew James Slopecki, Ph.D. student in the Biomechanics of Occupation and Sport (BOS) lab, supervised by Dr. Julie N. Côté's in the Department of Kinesiology and Physical Education. This presentation will inform researchers and clinicians about current practices in measuring and accounting for sex differences in upper-limb MSDs stemming from fatiguing, repetitive movement, and the potential of researching anthropometrics to develop the understand of these sex differences.

The presentation will be in English
