CRIR Students - Axis 2

Interested in getting involved in your research center?

One (1) student representative position is available for each CRIR's research axes : Axis 2.

The **role of Axis student representatives** is to promote a sense of belonging to CRIR, to unite students around scientific and social activities, to voice students' interests to the Scientific Direction, at the Research Orientation Committee (COR) and the Annual General Assembly (November), to ensure that the privileges and benefits of CRIR student members are maintained. Axis 1 and 2 representatives collaborate together and serve a 2-year term which entails:

Attendance to one or both Axis representatives at COR meetings and at the CRIR Annual General Assembly:

- Attend five Research Orientation Committee (COR) meetings (between the months of September and May), where scientific directors, axis and thematic unit leaders, site leaders, and clinical research coordinators from each of the member institutions meet.
- Attend the CRIR member's Annual General Assembly to present the activities of the Student Committee (end of November).

Coordination of the CRIR Student Committee:

- Ensure communications between the CRIR scientific direction and the Student Committee;
- Lead CRIR Student Committee meetings (4- 6 per year) and follow up on points on the agenda;
- Coordinate and contribute to the organization of the committee's events, activities and communications, in collaboration with the members of the Student Committee:
 - New students welcome day and Annual General Assembly of all CRIR students (early fall);
 - CRIR student colloquium held annually in the spring (or at another time depending on the circumstances), which represents the most important annual event for CRIR students;
 - Workshops and conferences to promote research excellence among CRIR students (3-5 per years).

- Manage the Facebook Student Committee page and if required, address student questions and comments.

Being involved in the Student Committee is an enriching experience that is very intellectually and professionally gratifying. It allows you to become more actively involved in the life of your research center. Please note that your involvement requires varying degrees of intensity during the years of your mandate (September 2026 to June 2028). The student committee's activities will begin with a meeting with CRIR's scientific leadership, which will take place between August 15 and 30 at the CRIR administrative headquarters. This meeting will offer an opportunity for all committee members to meet for the first time, as well as to receive general information about CRIR and upcoming activities for the year ahead.

Interested in taking up the challenge?

Send your application (CV and 200-word letter of interest) by email to the attention of Ms. Chantal Bibeau at administration.crir@ssss.gouv.qc.ca, with your supervisor in c.c., **no later than June 9, 2024.**

Eligibility Criteria

- Be a student member of CRIR, supervised by a CRIR regular researcher from Axis 2;
- Pursuing a graduate studies research degree (master's research, doctorate or postdoctoral internship);
- Carries out research in: **CRIR axis 2: Participation, social inclusion and rehabilitation services.** To learn more about Axis 2, [click here](#);
- Bilingualism (French and English) is required.

If you have any questions, please contact CRIR's administration (administration.crir@ssss.gouv.qc.ca). Please visit [CRIR's website](#) for more information on CRIR Student Committee activities.

We hope that this amazing opportunity will spark your interest!

The Scientific directors of CRIR and Institut universitaire sur la réadaptation en déficience physique de Montréal (IURDPM),

Philippe Archambault, OT, Ph.D.
McGill University

Claudine Auger, OT, Ph.D.
Université de Montréal
